

PHYSICAL AND BIOLOGICAL PARAMETERS

“ IAQ Consultants investigate each site thoroughly to find the source of complaints and offer cost effective, permanent solutions for remediation.

Biological contamination arises where there is dampness, predominantly caused by condensation, penetrating damp or from inadequately cooled and dry conditions supplied by air conditioning systems. Finding the source of problems can be difficult and will eventually result in damage to property and health complaints if not properly rectified. IAQ Consultants investigate each site thoroughly to find the source of complaints and offer cost effective, permanent solutions for remediation.

- Bacteria/Fungal
- Temperature
- Humidity
- Air flow speed
- Fibers
- Dust
- Odours
- Allergens
